

GDPR OFFER

EPICK™ for GDPR: an effective support for all public and private organizations involved in the process of adapting to the new Data Protection Regulation in place starting May 25th 2018.

Context

The GDPR extends the obligation of compliance to all organizations, European and non-European, that process personal data of individuals residing in the EU. Non-compliance can imply losses considering the sanctions, the risks for the business and to the company image.

EPICK™, provides appropriate functions and methodologies to carry out the set of activities that are necessary to prepare to GDPR compliance. The support offered by the tool is completed by a portfolio of services managed by a team of qualified specialists.

Features of GDPR Compliance

ASSESSMENT COMPLIANCE

To identify the GDPR compliance level of the client organization and monitor the compliance process over time.

REGISTER OF TREATMENTS

Track and monitor processing and key information in accordance with the new Data Protection Regulation.

SOFTWARE EVALUATION

To automatically analyze the level of adequacy of software applications in view of data protection by design through the support of CAST AIP.

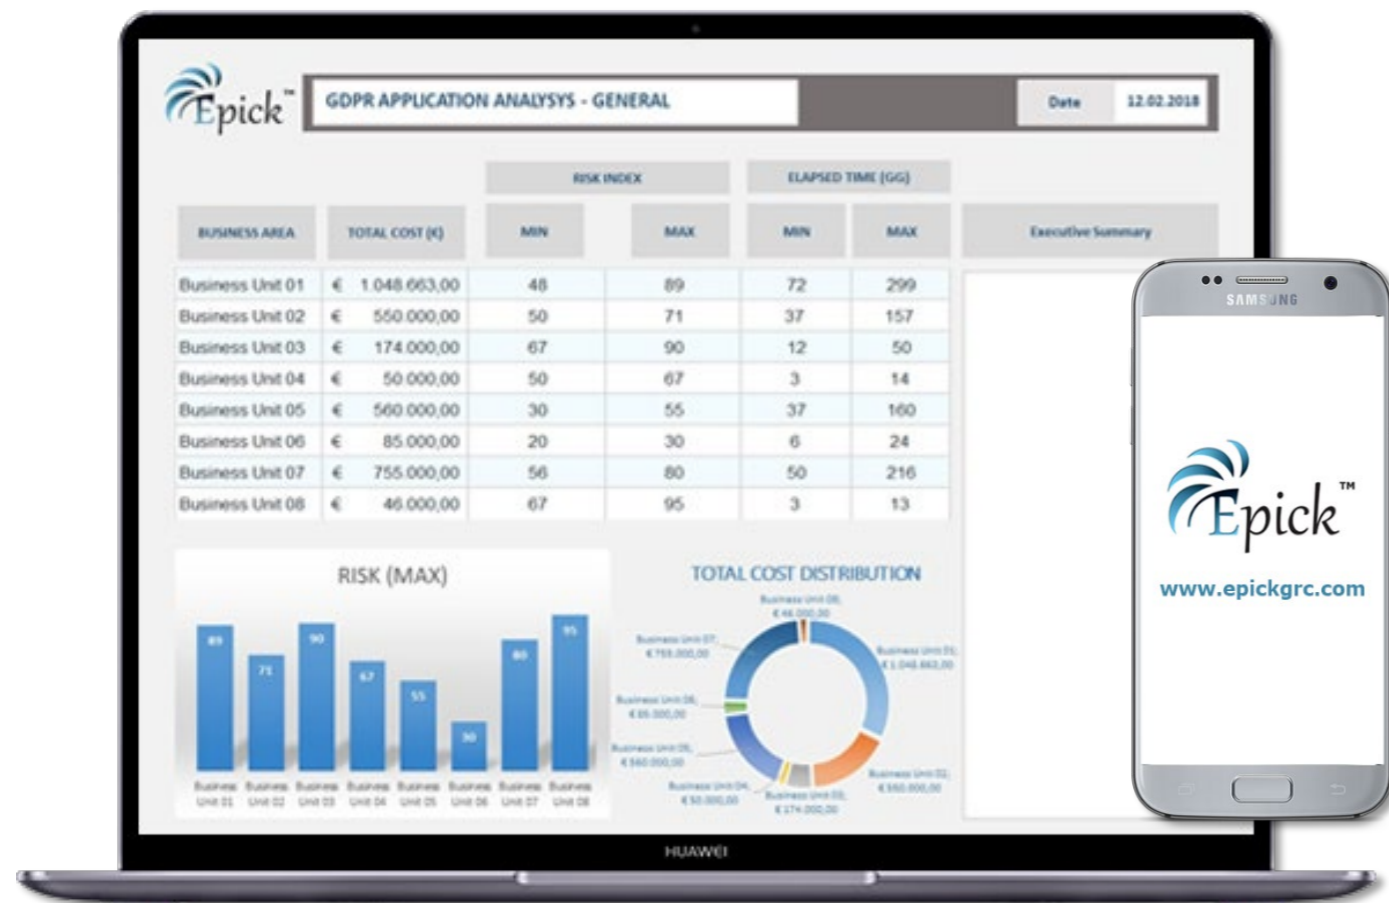

REMEDIATION PLAN

To define and implement remediation measures that optimize the overall cost/benefit ratio.

REPORTING

For the automatic generation of reports for the various stakeholders in the adaptation process.

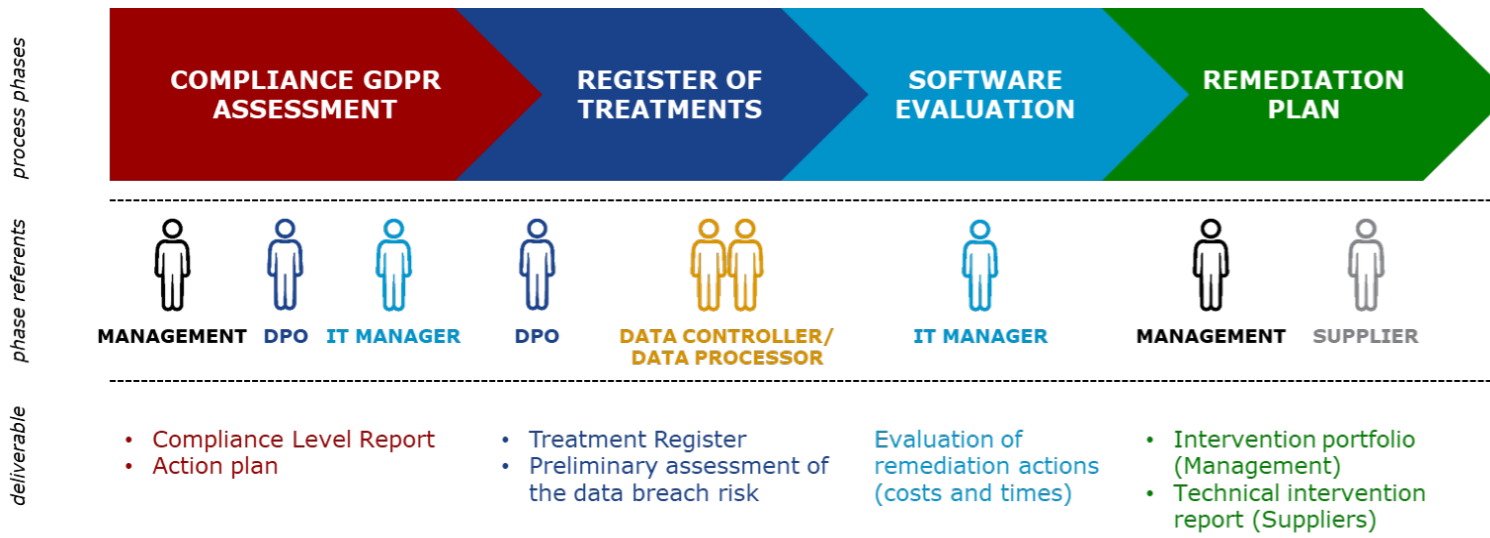

GDPR OFFER

EPICK™ for GDPR: a set of dedicated functions, robust methodologies, specialist advice and technical support services. An integrated and complete solution at customer service.
